Are you...

- looking for different ways to meet the needs of all the students in your math class?
- using centers, stations, or guided math groups, and are looking for ways to differentiate those groups?
- thinking of starting math groups, but you need a practical way to get organized, and then figure out where to begin?
- looking for answers on how to assess math groups and use that data to drive your instruction?

This workshop will provide the answers to these questions, and more.

Attendees must bring a laptop or other device for note taking and access to on-line resources.
