Description: In this two-day workshop, teachers and instructional leaders will be provided with professional development designed around the Illustrative Math 6-8 curricula and materials. Participants will engage in hands-on activities that deepen their understanding of the Five Practices Framework and illustrate the importance of norms and routines. Attendees will then learn how these practices can be applied to support teacher planning, foster student discussions, and build mathematical understandings.

The IM Instructional Academy is aimed toward teachers, instructional math coaches, or math team leaders in districts adopting or considering the Illustrative Mathematics 6–8 Math curriculum.

For additional information contact Sue Renehan at srenehan@crec.org.

Please bring ear buds and a laptop or other device for note taking and access to on-line resources.
