

ISTE Teacher Certification Training

Focused on pedagogy.
Based on the ISTE Standards.

ISTE Certification helps ambitious preK-grade12 educators rethink and redesign learning activities with technology to engage students in real-world, authentic, active learning. It is learner-focused and pedagogy-based, and gives educators the tools they need to change classroom practice and improve student outcomes, no matter what technology they are using. Training kicks off with a two day in-person experience, followed by five weeks of online course work. Participants complete approximately 30 hours of instruction and activities before assembling an e-portfolio that includes artifacts and reflections on their learning. Candidates have up to six months to compile their portfolios, which are then evaluated by the ISTE Certification review team.

As a result of taking part in this workshop, participants will:

- Gain valuable, transferable strategies to improve student learning
- Engage in dynamic, blended-learning activities
- Network with other educators who want to catalyze learning with technology
- Earn a nationally recognized certification

Two-day, in-person workshops followed by 5 weeks of online coursework.
\$750 per person. Maximum Enrollment: 30.
