

Business/Non-Instructional Operations

Video Cameras on School Transportation

Video cameras may be installed on school buses operated by CREC or its transportation contractor. The operation of the cameras must be the type initiated by the ignition switch and not controlled in any way by the vehicle driver. All recordings will remain in the custody of the transportation provider. The use of video cameras is primarily intended to be an extension of the disciplinary procedures employed by school administrators. Recordings may be used to supplement or support the investigation of disciplinary infractions.

(cf. 5131.111 – Video Surveillance)
